Metallic façades made of Corten steel

## Corten steel

Weathering patina for individual designs

Façades made of corten steel are something very special. Corten is a weathering steel which gets its natural rust-like patina by a protective layer on its surface under the influence of the weather.

Corten steel is therefore especially suitable for constructions which require an innovative and characteristic design – if in arts or architecture.

More from Metal.

■ Parish Hall  
Riedberg

■ Gardens  
Bad-Oeynhausen

■ Metallic interior fittings

Panelling of elevator entrances, building supports, socle wainscoting, ceilings, soffits, lintels, walls, stairs

■ Air pipe systems

Air pipes, ventilating eyes, ventilating grids for walls and oblique roofs, air-conditioning pipes

■ Metallic façades

Coffer panelling, metal shingle roofs, atticas, wing roofs, advertisement columns and plates

■ Kitchen ventilation technology

Extraction and circulation hoods, ventilation ceilings and extraction beams, air outlets

■ Service windows

Fast-food restaurants, cash counters, keeper's lodges, toll counters

■ Industrial services

Edge parts, laser cuttings, nibbling form parts, welding constructions, powder coating, tube and profile grinding, glass bead blasting

■ Plant components

Hot-air curtain appliances, socle and wall source air outlets, special outlets

■ Furnishings + Objects of Art

Furniture, accessories, custom-made items, metal objects of art
